EDUCATION

Bachelor of Science - Computer Science

University of The People

Sep 2023 - Expected Jun 2028

Pasadena, CA

Apple Developer Academy Diploma

Apple Developer Academy @Unina Federico II

Sep 2024 - Jun 2025

Naples, Italy

AWARDS

- Apple's WWDC 2025 Swift Student Challenge Winner

SKILLS

Swift | SwiftUI | Python | C | HTML | CSS | JavaScript | DSA | Design Patterns | iOS Development |

EXPERIENCE

Outlier.ai

Software Engineer

Aug 2024 - Present

San Francisco, CA (Remote)

- Trained AI on complex data structures, algorithms, and design patterns.
- Reviewed and optimized codebases for performance, scalability, and safety.
- Authored educational prompts to train LLMs on coding patterns and best practices.

DataAnnotation

Software Engineer

Jan 2024 - Apr 2024

United States (Remote)

- Assessed 100+ code submissions to enforce industry coding standards.
- Conducted QA on AI outputs and developed high-quality test prompts.
- Wrote and executed unit tests for LLM behavior evaluation.

Jmec Srl

Software Developer

Sep 2021 - Nov 2023

Portico di Caserta, Caserta, Italy

- Optimized front-end applications for speed, scalability, and reusability.
- Designed reusable UI components and REST interface layers.

Insurance Agency Experience

Front-End Developer

Mar 2019 - Jul 2021

Capodrise, Caserta, Italy

- Developed UI/UX features using HTML, CSS, JavaScript, and React.
- Built internal tools and client-facing interfaces.

NOTABLE PROJECTS

SpacePatrol - visionOS + FieldKit

iOS Development

Apr 2025 - Jun 2025

Apple Developer Academy, Italy, Naples

Space Patrol is a creative experiment designed to demonstrate the potential of FieldKit, a lightweight yet expressive mathematical framework tailored for visionOS. At its core, FieldKit provides dynamic, visual representations of various vector fields — with a primary focus on force vector fields — enabling intuitive exploration of spatial interactions and dynamics. Built using the Entity-Component-System (ECS) architectural pattern, the framework emphasizes modularity and scalability, laying a flexible foundation for future development.

Quotly (Apple's WWDC Swift Student Challenge Winner 2025)

iOS Development

Jan 2025 - Apr 2025

N/A

Quotly is a project that holds a special place in my heart — a passion-driven app designed to cultivate inspiration and self-awareness in everyday life. Born from a desire to offer moments of reflection in a world that rarely slows down, Quotly provides users with daily motivational quotes paired with the space to jot down personal thoughts and reflections. By encouraging mindful journaling through brief memos, the app aims to spark motivation and foster inner clarity.

SwiftUI Mini-Framework Series (In Progress)

SwiftUI API/Frameworks

Jun 2025 - Present

N/A

This series explores the creation of custom SwiftUI frameworks, progressing from the simplest building blocks to more advanced, intricate systems. Designed as a showcase of my technical approach and architectural thinking, each installment demonstrates my ability to craft meaningful, reusable components using patterns and design philosophies inspired by Apple's framework engineers.
